# Bika

The Bika chair is a slimline, stackable seating solution that redefines the multi-purpose chair category. Its seemingly simple form and soft aesthetic conceal a thoughtful, innovative approach to design.

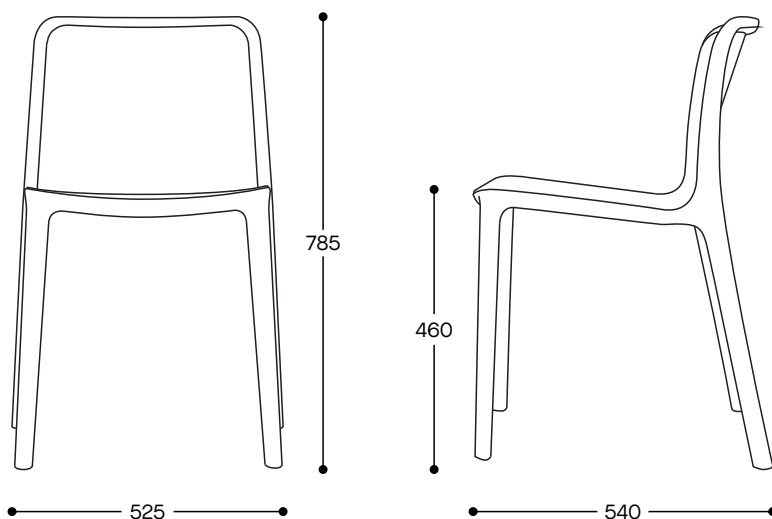

Featuring a sleek monocoque frame, Bika delivers strength, flexibility and style in equal measure. Its slender profile, smooth surfaces and crisp lines create a modern yet unobtrusive presence that suits a wide range of architectural settings.

Available in an array of seat colours, Bika offers excellent customisation, giving users the freedom to express their creative vision. Constructed from UV-stable plastics, it is also fully outdoor compliant, making it suitable for both indoor and outdoor environments.

Versatile and contemporary, the Bika chair is a favourite across commercial, educational, hospitality and community spaces.
