Bolt

The Bolt range is a robust and versatile seating solution designed to meet the demands of high-traffic dining, café, breakout and waiting environments. With a strong 19mm steel tube frame finished in either black powder coat or chrome, Bolt combines modern simplicity with long-lasting durability and easy maintenance.

Its ergonomically shaped bent plywood seat and backrest provide excellent comfort and support, making it ideal for extended sitting periods. Standard finishes include a clear polish seat and backrest or a black vinyl seat. For greater design flexibility, the seat and backrest can be custom stained, and a wide variety of upholstery options are available to complement any interior.

The stool is supplied at a standard 750mm seat height and the chair comes at 450mm seat height. Both the chair and stool are stackable for convenient storage, making Bolt a practical and stylish choice for commercial spaces.
