Why Trust a Certified Industry Leader?

With decades of experience in the furniture industry, Workspace has the expertise, infrastructure, and commitment to drive real change. Our dedicated fleet, certified recycling partners, and in-house capabilities ensure that every item we take back is handled responsibly.

As part of our commitment to reducing environmental impact, we also offset emissions across our entire delivery fleet, helping to minimise the carbon footprint of our operations while supporting a more circular economy.

*The Journey Doesn't
End at Delivery*

Why Choose us ?

Workspace is uniquely positioned to deliver a practical and reliable furniture take-back solution. With over a century of manufacturing experience, we understand furniture materials, construction methods, and end-of-life pathways better than most.

Unlike traditional waste disposal services, our approach prioritises recovery before recycling. Through refurbishment, component harvesting, material recycling, and responsible disposal, we seek to maximise the value retained in every item collected.

Our national delivery network and fully carbon-offset fleet enable efficient collection and transportation, while our trusted network of certified recycling and recovery partners ensures materials are managed responsibly and transparently.

As Australia's first furniture manufacturer certified to ISO 14006 Eco Design, sustainability is embedded into the way we design, manufacture, recover, and manage products throughout their lifecycle. With Workspace Circular Solutions, you gain a trusted partner that can help reduce landfill, support circular economy outcomes, and contribute to *Green Star (GBCA) credit achievement, while also strengthening ESG performance. This ensures your furniture is managed responsibly from collection through to final recovery.

**For builders & developers working towards Green Star certifications, partnering with Workspace may contribute to achieving higher Green Star ratings*

Buildings and Products*

Why throw out... ...when we can it take back

Furniture waste is a growing challenge, with thousands of desks, chairs, and tables ending up in landfill every year.

At Workspace, we're taking responsibility for change.

Introducing Workspace Circular Solutions - a take-back program that helps customers responsibly remove, recover, and recycle furniture during workplace refits. Through trusted recycling partners, we extend product life, recover valuable materials, and reduce landfill.

From end-of-use to new purpose - keeping furniture in circulation, not in waste.

*Where Old Furniture
Becomes New Opportunity*

The Options

RECYCLE

Items are collected directly from your site and transported to our Workspace facility in Melrose Park SA, where each piece is carefully disassembled. Components are then sorted and directed into appropriate recovery pathways, including reuse and recycling, to ensure landfill is minimised wherever possible.

REWORK

At Workspace, our skilled professionals can revitalise your furniture, whether it's reupholstering chairs, recutting tables to better fit your space, or repurposing materials for new uses.

REPURPOSE

We take a practical and innovative approach to repurposing furniture, giving a new use to furniture, ensuring materials are given a second life while reducing environmental impact.

HOW IT WORKS

1. Why should we participate in WCS?

The Workspace Circular Solutions take back program provides a responsible and sustainable solution for furniture disposal, whether or not it was originally purchased from us. We are committed to reducing waste and ensuring that furniture is either recycled, reworked or repurposed to extend its lifespan and minimise environmental impact.

2. What type of furniture do you accept?

The Workspace Circular Solutions take back program provides a responsible and sustainable solution for furniture disposal, whether or not it was originally purchased from us. We are committed to reducing waste and ensuring that furniture is either recycled, reworked or repurposed to extend its lifespan and minimise environmental impact.

3. How does this service work?

Once you choose to utilise our service, we will start by assessing the condition of your furniture through an audit. Depending on the type and condition, we will recommend the most suitable disposal option, we take care of everything, including transportation and logistics.

4. What are the costs associated with the service?

The cost may vary depending on the chosen option - whether recycling, reworking or repurposing. For more detailed information, please consult your dedicated Project Consultant.

*Keeping Furniture in
Circulation, Not In Waste*

5. How can I track the impact of my participation?

Workspace and our certified recycling partners provide documentation confirming the responsible recovery and recycling of your furniture where applicable. This gives you confidence that your furniture has been managed through appropriate recovery pathways and supports your organisation's sustainability objectives.

6. How can I get involved?

To get started, contact your dedicated Project Consultant, or contact 08 8374 8900. Our team will discuss your needs and explain the next steps.

7. What is the required time frame for a request?

For all projects, we require a minimum of 2 weeks' notice to ensure we can allocate appropriate resources and assemble the right teams. Depending on the size and complexity of the project, we may also conduct a site or asset survey, which requires additional coordination and time to organise.

8. When can I expect a quote turnaround?

Small projects – quote within 2-3 working days.

Large projects – site audit date to be confirmed within 3-5 working days on the condition all necessary questions have been answered, and we can get in touch with relevant person.

Quote to be completed upon completion of the site audit.

9. Who will I be in touch with during the process?

Your dedicated Project Consultant will be your main point of contact for both logistical matters and any questions related to finances and reporting. For transport, we utilise our own Workspace trucks and fleet, ensuring a seamless and efficient service.
