CX Chair

The CX Chair: Where Craftsmanship Meets Contemporary Design

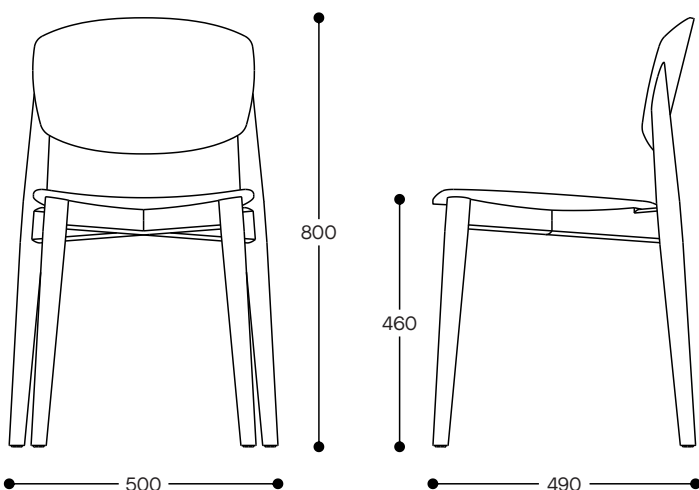

At Workspace, we have meticulously developed the CX Chair, investing substantial time and effort to create a piece that epitomizes elegance and functionality. Crafted from premium White Ash, this full timber chair is not only visually stunning but also offers exceptional durability.

The CX Chair features the option of an upholstered seat pad and back, available in a variety of fabrics, allowing for customisation to suit any interior design vision. Its stackable design ensures practicality without compromising style, making it ideal for cafes, restaurants, modern dining areas, and meeting rooms.

One of the standout features of the CX Chair is its beautifully designed screw caps on the back legs, adding a unique design element. The chair's contemporary styling, round tapering legs, and subtle curves on the seat and back create a visually light yet sturdy structure. The classic styling is complemented by perfect ergonomics, ensuring comfort for prolonged use.

The CX Chair can be stained to any suitable shade, providing versatility to match any decor. Its petite look, combined with exceptional design detail—particularly where the back legs meet the backrest—showcases our commitment to creating furniture that is both beautiful and practical.

Experience the perfect blend of aesthetics and strength with the CX Chair, a testament to Workspace's dedication to exceptional design and craftsmanship.
