CX Timber Collection

The CX Range: Where Craftsmanship Meets Contemporary Design

At Workspace, we have meticulously developed the CX range, investing significant time and effort to create a collection that balances refined aesthetics with everyday functionality. Crafted from premium White Ash, the CX Chair and stools are full timber pieces that deliver exceptional durability with a warm, natural presence.

The CX Chair is available with optional upholstered seat pads and backs in a wide selection of fabrics, allowing for customisation to suit a variety of interior settings. Its stackable design ensures practicality without compromising style, making it ideal for cafés, restaurants, meeting rooms and modern dining spaces.

The CX Stool is offered in two height options, extending the range seamlessly into bar and counter environments. Both chair and stool share the same thoughtful detailing, including distinctive screw caps on the back legs, elegant tapering turned legs, and subtle curves through the seat and back that create a visually light yet robust form.

Available in a wide range of stain finishes, the CX range showcases Workspace's commitment to timeless design, comfort and craftsmanship—furniture designed to perform beautifully across diverse commercial interiors.
