Felix

The Felix chair is a stunning Scandinavian style product family brought to you by the Workspace Commercial Furniture design team that features a mid sized lounge, tub and chair option and oozes style and comfort. 100% designed and manufactured by Workspace, Felix is Australian made furniture at it's best.

After recognising a shift in the types and styles of lounge seating being specified across all sectors, Workspace in consultation with clients and users alike, designed the Felix range to fit the "home away from home" that is on trend across the board.

This Scandinavian inspired range was designed to be robust and versatile without compromising the slim contoured lines, warm textures and overall comfort making this family of products suitable for a diverse range of applications.

All things have been considered to provide the most appropriate seating solution for multiple environments. From the dimensionality allowing for maximum support, comfort and ease of access to the removable seat pad on the lounge version for better cleaning and maintenance. The Felix range really does provide a solution to all your seating problems.

The lounge comes with either timber 4 leg or sled bases, and the chair and tub chairs come with either timber 4 leg, steel 4 leg or swivel bases. Pair this with high quality upholstery and comfort and the Felix family becomes the perfect compliment to any space.
