Loria sustainable eco shell with swivel base on castors

# Loria

Loria is a versatile seating collection defined by a refined, sculptural shell and a thoughtfully considered system of interchangeable components. Designed and manufactured in Italy, Loria offers flexibility without compromising on elegance, making it a confident solution across a wide range of environments, including outdoors!

The collection is available in a standard shell, tub shell and low-back tub shell (for stool applications), paired with a choice of bases including 4-leg steel, sled, swivel on castors and sled stool. Shells are offered in classic black or white, with bases in chrome or black, allowing seamless coordination across settings. An eco-friendly option is also available as an indent item, manufactured from 100% recycled materials in a warm grey tone, with a matching recycled plastic base.

All shells and bases are fully interchangeable, and comfort can be enhanced with an upholstered seat pad or full upholstery across all shell types.

With its calm palette, clean lines and adaptable design, Loria transitions effortlessly between work cafés, meeting rooms, waiting areas, hospitality, education and collaborative spaces—bringing a sense of quiet luxury, functionality and contemporary polish to every interior or exterior.

Loria stools with low-back tub shells
