

M-Collection Magnetic Glassboards

The M-Collection glassboard is the perfect addition to any space whether it be office, meeting rooms, schools or cafes. Workspace's exclusive ultra clear glass boards are a contemporary and highly practical alternative to the traditional whiteboard.

Made with extremely safe and durable tempered 4mm safety glass, the surface is highly durable with no green tinge allowing it to be a higher standard than traditional whiteboards. The benefits of the ultra ensures the glass will not ghost or stain - regardless of how long the ink is left on. Additional accessories can be added to the glassboard to maximise potential and accessibility. The frame-less design creates a visually appealing way to join multiple boards together to form a communication wall.
