Pop

The Pop Table range features our signature Drum and Cone bases, offering a clean, contemporary aesthetic that brings warmth and character into any setting. Available in a refined timber-look finish—either in veneer or battens—Pop delivers a simple yet sophisticated presence that elevates both the space and the interactions around it.

Designed for versatility, the range spans from coffee-table height through to standing height, with circular tops up to 1350 mm diameter and square tops up to 1200 × 1200 mm. Tops are available in a wide selection of finishes, including veneer and laminates, and can be fully customised to suit your project requirements.

Pop bases can be used individually or in pairs to support customised “D-end” tops, rectangular tops, or other unique shapes—making the design possibilities virtually endless.
