Wheelie

Wheelie Screen is a versatile, mobile partition designed for open environments where temporary privacy and focus are essential. Ideal for offices, classrooms and shared spaces, it helps quickly define zones for discussion, collaboration or individual concentration.

Available in multiple sizes, Wheelie Screen can be specified with acoustic panels, upholstered pinnable panels, or a magnetic whiteboard surface for brainstorming and note-taking. The sleek steel frame delivers strength, stability and a contemporary aesthetic, while silent, lockable castors allow effortless repositioning.

Whether creating a pop-up meeting nook, shielding a workspace from view, or supporting focussed work, Wheelie Screen adapts instantly to changing spatial needs.
